**PROBLEM 1**

Create a new HTML page called "p1.html" and do the following (check the *resources* folder for the image(s) and additional material).

1. Add a comment in the head of the page stating the author of the document (yourself) and the date.
2. Add a heading that reads "Meet" followed by our first name. Let it be of type h2 and make it large, bold, italic, and center-aligned at the top of the page.
3. Underneath it, insert an image of yourself that is also center-aligned. Its *alt* attribute should have as a value your full name.
4. Add the paragraph shown below. Mind the italicized word "look".
5. Add then the next paragraph and the bulleted list.
6. Don't forget to add the hyperlink to AUB's Computer Science department website. Get the URL from the website.
7. Add a horizontal line
8. Add a copyright statement. Mind the Copyright symbol.
9. Add a hyperlink and replace "[Your Name]" with your full name. Once clicked, it creates a new email with your email in the "to" field.

The following is a screenshot of the page (mind that the image is missing since it should be replaced with yours).

PROBLEM 2

Create the exact same page shown below using HTML and CSS and save in a file named "p2.html". Mind that the hyperlinks become red whenever they are visited. AUB's logo can be obtained from "resources" folder. The "location" contains two values "Beirut" and "New York". The box surrounding the Gender is an "itemset".

Once done, zip all your files and call them "*AUBnetid*-hw1.zip/rar" and submit it to Moodle.
